Structural Design and Analysis

INITIAL MEETINGS

Initial meeting to understand client's concept for work. we share our ideas. from concept from clients end we start work in on project. And we will start to gather key information such as site survey or previous plan.

MAKE PURPOSAL AND CONCEPT DESIGN OPTION FOR PROJECT'S.

From client's perspective and our ideas, we make proposal options for project for next meeting. When the project's parameters are established, we will begin developing concepts. These will be influenced by project scope, budget and your individual requirements.

DEVELOPING DESIGN

Concept design is essentially a range of solutions to the brief. We developed through drawings, floor plan and perspective sketches and computer renderings.

SUBMITTING DETAILED DESIGN AND COST BREAK DOWN

Once resource consent is approved, your project will progress to the detailed design phase. This means we will advance your design to the level of detail that allows a construction contractor to assess the full scope of the project. This will include construction details,

"YOU DREAM IT, WE BUILD IT-As structural engineers, we transform the vision of the Architect. We like difficult and challenging projects that push the engineering complexity further. In short, we understand and build the dream of the architect into reality" intelligence."
